- Weight incl. packaging: 17 kg

Accessories
- Included accessories: Batteries for remote control, Power cord, Remote control, Table top stand, User manual
- Optional accessories: Set up Remote RC2573GR, Wireless SmartLoader 22AV1120

Product highlights

Wireless SmartLoader
Provides the ability to copy easy and wireless programming settings from one TV set into other TV sets in less then a minute. The feature ensures uniformity between TV sets and significantly reduces installation time and costs.

External loudspeaker connector
Amplified audio connector for easy installation of external speakers (such as for bathrooms), eliminating the need for investments in external equipment

Front/Side controls locking
By selecting in the set up menu the option to lock or unlock access to the front and side controls of the TV, unauthorised acces to the TV menu is prevented saving the hotelier time and effort of re-installing.

Battery Low Detection
This feature informs of the need to replace the remote control batteries preventing unneccessary replacement of batteries.

SmartCard Xpress Box
The optional SmartCard Xpress Box can be mounted at the rear side of the TV set and allows third party decoders and application cards to interface with the TV and adding new functionality. The TV can also be connected to external decoders and set-top boxes of all major interactive system providers, through the Serial Xpress Control Interface (supporting UART and RS232 protocols) and the SmartPlug Control interface.

Add. integrated power supply
The additional integrated power supply avoids the need for a separate power supply for an interactive system. In case of stand-alone use, the additional power supply can be switched off to save energy.

Volume limitation
This feature predefines the volume range with which the TV set is allowed to operate, preventing excessive volume adjustments and avoiding disturbance of next door neighbours.

Welcome message
A welcome greeting is displayed each time the TV set is switched on.

HD Ready
Enjoy the exceptional picture quality of a true High Definition TV signal and be fully prepared for HD sources like HDTV broadcast, Blu-ray DVD or HDVD. HD ready is a protected label that offers picture quality beyond that of progressive scan. It conforms to strict standards laid out by EICTA to offer a HD screen that displays the benefits of resolution and picture quality of a High Definition TV signal. It has a universal connection for both analog YPbPr and uncompressed Digital connection of DVI or HDMI, supporting HDCP. It can display 720p, and 1080i signals at 50 and 60Hz.

ESP™
Feature can be selected in the set-up menu. The TV can be switched off automatically after a specified period of use saving energy and providing extended product life time. The selectable range is from 0 to 99 hours.
